

# The AI Agent Platform Pre-Built for NetSuite

*Automate Process, Improve Business Results & Consolidate Your Tech Stack*

## Automate and Improve your Key Business Processes

Cauzy let's everyone on your team multiply themselves with a digital workforce that automates and improves their processes – increasing productivity and outcomes. Cauzy replaces a fragmented collection of SaaS tools, manual spreadsheets, and disconnected AI experiments with a single, purpose-built AI Agent Platform. Cauzy reads and writes data from NetSuite in real-time, plus connects to all your other key business systems. Here are a few of the many key businesses process that we automate and improve:

<b>Analysis Automation</b>	<b>Cash Flow Forecasting</b>	<b>Month End Close</b>
<b>Demand / Supply Planning</b>	<b>AP Automation</b>	<b>Order Entry</b>
<b>Cash Application</b>	<b>Bank Reconciliation</b>	<b>Financial Forecasting</b>
<b>Commissions Calculation</b>	<b>Single or batch Record / Transaction Creation</b>	<b>Inventory Optimization</b>

## Three Steps to AI-Driven Insights

<b>1</b>	<p><b>Connect</b></p> <p>Cauzy pulls real-time data from NetSuite with access to all your transactions, records, system notes and custom fields. The install takes less than 10 minutes. Your experience will be 100% accuracy without hallucinations.</p>
<b>2</b>	<p><b>Build agents</b></p> <p>Using our self-service agent building platform you can immediately start building agents and/or use any of our pre-built agents from our marketplace. The average agents take 15–60 minutes to build.</p>
<b>3</b>	<p><b>Drive outcomes</b></p> <p>Empower teams with collaborative AI agents that provide a repeatable, scalable and fast ROI.</p>

## Powerful Features. One Platform.

<p>◆ <b>Agents &amp; Marketplace</b></p> <p>Build unlimited agents or choose from pre-built marketplace agents for instant automation.</p>	<p>◆ <b>100% Data Accuracy</b></p> <p>Pre-validated data approach with RAG-powered AI training ensures always-accurate results – no SQL knowledge required.</p>
<p>◆ <b>NetSuite Writeback</b></p> <p>Push validated data back to NetSuite as single or batch transactions with human-in-the-loop approvals.</p>	<p>◆ <b>Multi-Step Agents</b></p> <p>Chain automated workflows across multiple systems and data sources in a single agent run.</p>

<p>◆ <b>Massive Data Scale</b> Handle millions of rows and gigabytes of data – far beyond what standard LLM platforms support.</p>	<p>◆ <b>Multi-Source Integrations</b> Connect SQL, Snowflake, Salesforce, Shopify, and more out of the box alongside your NetSuite data.</p>
<p>◆ <b>MCP Connector</b> Built-in MCP Server lets any LLM or AI tool run Cauzy Agents, bypassing data volume limits.</p>	<p>◆ <b>Data Distribution</b> Send insights automatically to Teams, Slack, Email, or cloud storage on a schedule.</p>
<p>◆ <b>Collaborative Workspaces</b> Share agents, reports, and dashboards across teams in real time with governance controls.</p>	<p>◆ <b>Enterprise Security</b> SOC 2 Type II compliance with enterprise-grade encryption, NetSuite roles/permissions adherence, and SSO via Okta and Azure AD.</p>

## How Cauzy Extends Top LLMs into an AI Application

Features	Cauzy AI for NetSuite	AI Websites Claude / ChatGPT / Gemini, etc.
<b>Approach to AI</b>	Cauzy is the Application approach to AI (repeatable, accurate, consistent) using agents.	One-off prompt approach using chatbots. Requires copy/pasting prompts that inaccurately have to go figure out what data to return to the user.
<b>Agents vs. Chatbots</b>	Pre-built Agents and Build-Your-Own Agents Functionality. Agents are shared collaboratively, have governance and repeatability.	Chatbots are the spreadsheet approach to AI, they live on the users computer and in saved word documents (aka prompt libraries).
<b>Accuracy</b>	100% data accuracy because of our pre-defined data approach and extensive AI training from Cauzy. Plus ability to bring in millions of rows of data.	Prompts guess what data you need and return inaccurate data 90%+ of the time. You must know how to read code (ie SQL) to validate the data for every single prompt.
<b>NetSuite Expertise</b>	Experience from working with 1,000+ NetSuite customers	No NetSuite ecosystem relationships
<b>ROI</b>	1,000+ hrs automated/year & no need for new headcount	Used for AI experiments to prove out that a business needs to go purchase an AI application
<b>Buy vs. Build</b>	Buy a pre-built solution with all our enterprise grade features, security and scalability. See our Features page for more details on what's included. It would take an experienced team of AI engineers at least 1-2 years to replicate.	Largely build a solution from scratch. You wouldn't build your own ERP, so don't get caught trying to build your own AI platform.

1,000+ hrs  
automated/year

10 Minute  
installation

No New  
headcount

Flat-Fee Pricing  
(LLM costs included)
